PEL Topics Index

Last updated on: 2024-12-04 Note: with PEL, type <f11> <f1> to open this PDF index.

Emacs Reference Cards

☝With PEL, access these cards from Emacs with the <f11> ? e r key sequence.
See Σ Help/Info for more info.

These are links to the PDF version of official English version of the quick reference cards for GNU Emacs and popular external packages. PEL documents Emacs key bindings as well, these cards provide useful complement to what PEL provides.

Emacs	Calc	Gnus	Magit Cheatsheet	Org	Viper
Emacs survival card	Dired	Gnus booklet	Magit Ref-card		VIP

➢ PEL Overview

PEL license

- PEL repo
- PEL Readme
- PEL Manual
- PEL NEWS
- Discussions

This table holds links to the PEL file tables (hosted on Github as raw PDF files).

☝For the best user experience, use a browser that can render PDF directly instead of downloading.
- Mozilla Firefox (version > 78) does that perfectly. You may need to activate a plug-in for other browsers.
- With that in place, you can browse through all the PDFs and reach a vast amount of information quickly.

☝From within Emacs open this topic index PDF by typing the <f11> ? <f1> key sequence. More help topics with <f11> ? p keys.

☝The symbols, colour coding and various other conventions are described in the ➢Legend PDF.

Terminal Multiplexers: GNU screen , Tmux
Command Line Scripting Languages: bash, sh, zsh
Cmdline: GNU readline, ls -l

General Info ➢	➢Legend	➢Recommended Emacs User Option	➢Themes	Migrate from CRiSP
Startup ➢		Run Emacs daemon & clients	iMenu/Speedbar support

Σ Emacs Features

Cells link titles starting with only Σ are Emacs generic features, blue links are external packages. The green links are mostly PEL extensions.

- A Guided Tour of Emacs.
- Awesome-Emacs
- MELPA and GNU ELPA

The tables listed at right describe Emacs commands & key bindings for concepts & features. The cell is light-blue for major mode, light-red for minor mode specific concepts. Grey cells are links into other pages for important concepts.
Emacs commands can be executed by name or bound to key sequences. They describe the commands, their arguments and the key sequences bound to them.
- Emacs Keys
- Numeric Arguments

You can also:
- Run Command by Name

Emacs uses a concept of modes:
- Emacs Major and Minor Modes
  - Major Modes
  - Minor Modes
  - Choosing Modes

PEL provides several key sequences to toggle minor modes.

𝑥ℙ𝕃 - Emacs Lisp concepts & tools	𝑥 display-buffer	𝑥※ - ELisp Types	𝑥 ERT (regr-testing)	𝑥 Hooks	

XRef - Cross Reference Tools

See also: Σ Xref

Emacs supports various cross reference mechanisms described in the Σ Xref table. These mechanisms take advantage of various external tools and integrate with them. Notes about those tools are available in the tables listed in this section.

Xref-Support	Xref-Frontend	Xref-Backend

PEL supports installation and partial setup of the following tools:

Build Tools & Preprocessor

PEL has support for several build tools but they are not all documented in a page.
- Nix 📦 Requires nix-mode external package activated when pel-use-nix-mode user-option is tuned on.
- Tup 📦 Requires tup-mode external package activated when pel-use-tup user-option is tuned on.

Programming Languages

Main Paradigm of Programming Language Families
- *Actor Model:* Ⓐ
- *Concatenative* Ⓚ
- *Concurrent:* ⓒ
- *Domain Specific* ⓓ
- *Dynamic* 𝒹
- *Functional:* ⓕ *Pure:* Ⓕ
- *Imperative:* ⓘ *or no token*
- *Object Oriented* ⓞ
- *Procedural* Ⓟ
- *Has Syntactic Macros:* ⓜ
- *System Level* Ⓢ

- The programming languages supported by PEL are listed here in alphabetical order.
- Emacs (and PEL) also provides basic support for other programming languages not listed here.

Future support for Crystal, Elm, Kotlin, Lua, Purescript, ReasonML, Seed7, Typescript, Zig and documentation of support for Ada, Fortran, Javascript, Java, Modula, Pascal (based on my need for them or requests).

Emacs has major mode support for several programming languages. PEL extends Emacs support for some of them (others are marked 🚧).

BEAM Programming Languages	*Functional Languages*	Javascript target	Lisp Family Languages	Lisp-like Languages	
Curly Bracket Languages	Java Virtual Machine Languages	ML Family Languages	Scheme Language Dialects	Stack Based Languages	

Cell colours identifies the programming language family(ies).
