⚠️

Description	Keystroke	Function	Note
Seed7 Editing	PEL supports for the Seed7 programming language is experimental and not yet documented except for what you see here. 📦 The seed7-mode external package is installed when 🔧 the pel-use-seed7 user-option is set to t.		
Last updated on: 2025-03-30	🚧⚠️ I did not yet implement seed-mode. Therefore at the moment, pascal-mode is used for Seed7 files (files with .sd7 and .si7 extensions). The is on my list of things to do next.

If the prefix argument (like C-u or M--) is used, then it opens the remote GitHub hosted raw PDF instead. If the pel-flip-help-pdf-arg user-option is set it's the other way around.
