

Emacs support for editing Nix files 🚧

Description	Keystroke	Function	Note
Nix Last updated on: 2025-06-14	Emacs does not support the Nix build system file editing natively. PEL provides supports via the Requires nix-mode external package 📦 Requires nix-mode external package 📄 activated when pel-use-nix-mode user-option is tuned on. More information about nix-mode: <ul style="list-style-type: none">nix-mode @ Githubnix-mode manual @ Github		
Open this PDF file. See also: 📄 Help/Info	<f12> <f1>	(pel-tup-help &optional OPEN-WEB-PAGE)	Open the 📄 - Nix local PDF. If the prefix argument (like C-u or M--) is used, then it opens the remote GitHub hosted raw PDF instead. If the pel-flip-help-pdf-arg user-option is set it's the other way around.
Comments			
Insert, realign, comment/uncomment region See also: 📄 Comments With PEL : Comment the current line with M-0 M- ;	M- ;	(comment-dwim ARG)	Insert or realign comment on current line (or region if a region is active). If line/region is already commented, uncomment it. <ul style="list-style-type: none">On a single line, the comment is placed <i>after</i> the code.C-u M- ; executes comment-kill
		(pel-comment-dwim ARG)	Same as comment-dwim but comments the current line with a numeric ARG or 0.
Nix control	🚧. The nix-mode supports several commands and scenarios. Refer to the nix-mode manual @ Github . PEL integration is very preliminary. 🚧
