• Emacs Eask CLI for building, running, testing and managing Emacs Lisp dependencies.	<ul style="list-style-type: none">• Emacs Eask @ home• Emacs Eask @ Github<ul style="list-style-type: none">• Eask releases		<ul style="list-style-type: none">• Eask is written in Emacs Lisp and Javascript.• Node.js and npm are not required to <i>use</i> Eask but required to <i>build</i> it.	
	• Why Eask?		• Eask supports Linux, macOS and Windows	
	• Installation	• There are several methods provided to get a pre-built version of Eask. The advantages to these, compared to building from source, is that you do not have to install Node.js and npm, which are both required to build Eask.
