

⚠ Emacs support for Nim ⚠

Description	Keystroke	Function	Note
Nim Editing	Emacs does not provide any built-in mode for nim.  To activate support for nim on PEL, the pel-use-nim user-option must be turned on (set to t). • When pel-use-nim is turned on the <f11> SPC n prefix is made available. PEL provides the following user-options to download and activate nim supporting Emacs packages. It uses the tuareg-mode as the major mode for nim files.  The nim-mode external package is required.  PEL installs and activates it when the pel-use-nim-mode user-options is turned on. ⚠ PEL support for nim is not complete. More commands should be provided and documented. nim support is preliminary.		
Open this PDF file. See also: ↗ Help/Info	<f11> SPC n <f1> <f12> <f1>	(pel-help-pdf &optional OPEN-WEB-PAGE)	Open the Ⓜ - Nim local PDF. If the prefix argument (like C-u or M--) is used, then it opens the remote GitHub hosted raw PDF instead. If the pel-flip-help-pdf-arg user-option is set it's the other way around.
↗ Customize PEL nim support	<f11> SPC n <f2> <f12> <f2>	(pel-customize-pel &optional OTHER-WINDOW)	Customize PEL nim support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.
↗ Customize Emacs nim support	<f11> SPC n <f3> <f12> <f3>	(pel-customize-library &optional OTHER-WINDOW)	Customize Emacs nim support: nim • If OTHER-WINDOW is non-nil (use C-u), display in another window.
Comments			
Toggle display of comments in buffer or active region See also: ↗ Comments	<f11> ; ;	(hide/show-comments-toggle &optional START END)	Toggle hiding/showing of comments in the active region or whole buffer. • If the region is active then toggle in the region. Otherwise, in the whole buffer.  This requires the hide-comnt.el package (see ↗ Comments).  PEL activates it when the pel-use-hide-comnt user option is t .
