

PEL Topics Index

Emacs Reference Cards		These are links to the PDF version of official English version of the quick reference cards for GNU Emacs and popular external packages. PEL documents Emacs key bindings as well, these cards provide useful complement to what PEL provides.					
👉 With PEL you can access these via the <f11> ? e r key sequence. See 🔗 Help/Info		Emacs	Calc	Gnus	Magit Cheatsheet	Org	Viper
		Emacs survival card	Dired	Gnus booklet	Magit Ref-card		VIP
➤ PEL Overview							
This table holds links to the PEL tables. Each cell holds a hyperlink to the GitHub hosted raw PDF table.							
👉 For the best user experience, use a browser that can render PDF directly instead of downloading.							
<ul style="list-style-type: none">• Firefox does that. You may need to activate a plug-in for other browsers.• With that in place, you can browse through all the PDFs quickly and reach a vast amount of information.							
👉 From within Emacs open this topic index PDF by typing the <f11> ? <f1> key sequence.							
👉 The symbols, colour coding and various other conventions are described in the ➤Legend PDF.

🔗 Emacs Features							
The links that start with only 🔗 are built-in Emacs, the links that are blue are external packages.							
These PEL tables describe the Emacs commands and key bindings for generic concepts and features.							
Emacs uses a concept of modes. See:							
<ul style="list-style-type: none">• Emacs Major and Minor Modes<ul style="list-style-type: none">• Major Modes• Minor Modes• Choosing Modes							
PEL provides several key sequences to toggle minor modes, described in the relevant PDFs.							
Emacs commands can be executed by name or bound to key sequences. The commands may have arguments and keys can express them. See:							
<ul style="list-style-type: none">• Emacs Keys							
🔗🖱️ - Emacs Lisp concepts & tools		🔗 ERT	🔗 Hooks				
XRef - Cross Reference Tools							
Emacs supports various cross reference mechanisms described in the 🔗 Xref table. These mechanisms take advantage of various external tools and integrate with them. Notes about those tools are available in the tables listed in this section. 🚧 This is work in progress.							
		🔗 Xref-Support	🔗 Xref-Backend				
Build Tools							
PEL has support for several build tools but they are not all documented in a page. Aside from the list below, PEL supports installation and partial setup of the following tools:							
<ul style="list-style-type: none">• Nix 📦 Requires nix-mode external package 🖱️ activated when pel-use-nix-mode user-option is tuned on.• Tup 📦 Requires tup-mode external package 🖱️ activated when pel-use-tup user-option is tuned on.
