

Emacs support for REXX

Description	Keystroke	Function	Note
REXX programming Language Support	Support for the REXX programming language is minimal: you can activate the forth-mode package by setting the pel-use-rexx user option. <ul style="list-style-type: none">Files with the .rexx, .elx, .ncomm and .cpr are recognized as REXX source files and will automatically activate forth-mode if the package has been activated via that user-option.Generic programming language features like template text insertion handle REXX comment style. See ⌘ Inserting Text . REXX support is provided by rexx-mode external package  automatically downloaded and installed by PEL when the pel-use-rexx user option is set to t.		
Open this PDF file. See also: ⌘ Help/Info	<ul style="list-style-type: none"><f11> SPC R <f1><f12> <f1>	(pel-help-pdf)	Open ⌘ I - REXX local PDF file.
⌘ Customize PEL REXX support	<ul style="list-style-type: none"><f11> SPC R <f2><f12> <f2>	(pel-customize-pel & optional OTHER-WINDOW)	Customize PEL REXX support. <ul style="list-style-type: none">If OTHER-WINDOW is non-nil (use C-u), display in another window.
