

# Emacs Support for Janet

Description	Keystroke	Function	Note
<b>Janet Programming Language Support</b>  See also: • <a href="#">                         ≡ Customize                     </a>	<div>  PEL provides experimental support for the <b>Janet Programming language</b>, a Lisp-like functional programming language that can easily be embedded.                              This document is in early state. Since Janet uses Lisp syntax, all packages supporting Lisp languages can be used, specifically <a href="#">                                 ⓘ Lispy                             </a>.                         </div> <div>  PEL activates Janet support when the <b>pel-use-janet</b> user-option is turned on (<b>t</b>) or when one of the following other user-options that activate specific packages:                             <div>  The <b>janet-mode</b> external package  activated by <b>pel-use-janet-mode</b>.                                     <ul style="list-style-type: none"> <li>PEL currently uses <b>my fork of the janet-mode project</b> that integrates a couple of fixes.</li> </ul> </div> <div>  The <b>ijanet-mode</b> external package  activated by <b>pel-use-ijanet-mode</b>.                                     <div>  The <b>inf-janet</b> external package  activated by <b>pel-use-inf-janet</b>.                                         </div> </div> </div> <div>                             To activate Janet support for the first time use <b>&lt;f11&gt; &lt;f2&gt; pel-pkg-for-janet</b> and turn <b>pel-use-janet</b> on. Later you can use the key bindings shown below.                             <ul style="list-style-type: none"> <li>PEL provides Lispy support for Janet when the janet-mode is added to the list specified by <b>pel-modes-activating-lispy</b> user-option. See <a href="#">                                 ⓘ Lispy                             </a></li> </ul> </div>		
<b>Open this PDF file.</b> See also: <a href="#">                         ≡ Help/Info                     </a>	<div> <b>&lt;f11&gt; SPC T &lt;f1&gt;</b> </div> <div> <b>&lt;f12&gt; &lt;f1&gt;</b> </div>	<div> <b>(pel-help-pdf</b> &amp;optional OPEN-WEB-PAGE)                         </div>	Open the <b>ⓘ - Janet</b> local PDF. If the prefix argument (like <b>C-u</b> or <b>M--</b> ) is used, then it opens the remote GitHub hosted raw PDF instead. If the <b>pel-flip-help-pdf-arg</b> user-option is set it's the other way around.
<a href="#">                         ≡ Customize                     </a> PEL Janet support	<div> <b>&lt;f11&gt; SPC T &lt;f2&gt;</b> </div> <div> <b>&lt;f12&gt; &lt;f2&gt;</b> </div>	<div> <b>(pel-customize-pel</b> &amp;optional OTHER-WINDOW)                         </div>	Customize PEL Janet support: pel-use-janet, pel-use-janet-mode, pel-use-ijanet, pel-use-inf-janet <ul style="list-style-type: none"> <li>If OTHER-WINDOW is non-nil (use <b>C-u</b>), display in another window.</li> </ul>
<a href="#">                         ≡ Customize                     </a> Emacs Janet support	<div> <b>&lt;f11&gt; SPC T &lt;f3&gt;</b> </div> <div> <b>&lt;f12&gt; &lt;f3&gt;</b> </div>	<div> <b>(pel-customize-library</b> &amp;optional OTHER-WINDOW)                         </div>	Customize Emacs Janet support: janet, ijanet, inf-janet <ul style="list-style-type: none"> <li>If OTHER-WINDOW is non-nil (use <b>C-u</b>), display in another window.</li> </ul>
