➤ PEL Overview						
This table holds links to the PEL tables. Each cell holds a hyperlink to the GitHub hosted raw PDF table.						
👉 For the best user experience, use a browser that can render PDF directly instead of downloading.						
• Firefox does that. You may need to activate a plug-in for other browsers.						
• With that in place, you can browse through all the PDFs quickly and reach a vast amount of information.						
👉 From within Emacs open this topic index PDF by typing the <f11> ? <f1> key sequence.						
👉 The symbols, colour coding and various other conventions are described in the ➤Legend PDF.

XRef - Cross Reference Tools						
Emacs supports various cross reference mechanisms described in the 🔗 Xref table. These mechanisms take advantage of various external tools and integrate with them. Notes about those tools are available in the tables listed in this section. 🚧 This is work in progress.						
🚦 Xref-Support		🚦 Xref-Backend				
Build Tools						
PEL has support for several build tools but they are not all documented in a page.						
Aside from the list below, PEL supports installation and partial setup of the following tools:						
• Nix 📦 Requires nix-mode external package 🔗 activated when pel-use-nix-mode user-option is tuned on.						
• Tup 📦 Requires tup-mode external package 🔗 activated when pel-use-tup user-option is tuned on.						
🔗 - Make
