Emacs support for the Seed7 Programming Language

⚠️

Description	Keystroke	Function	Note
Seed7 Editing	PEL supports for the Seed7 programming language is experimental and not yet documented except for what you see here. 📦 The <code>seed7-mode</code> external package is installed when  the <code>pel-use-seed7</code> user-option is set to t.		
Last updated on: 2025-03-30	 I did not yet implement seed-mode. Therefore at the moment, pascal-mode is used for Seed7 files (files with .sd7 and .si7 extensions). The is on my list of things to do next.		
Open this PDF file. See also: 📘 Help/Info	<code><f11> SPC 7 <f1></code>	<code>(pel-help-pdf</code> &optional OPEN-WEB-PAGE)	Open the 📘 - Seed7 local PDF. If the prefix argument (like <code>C-u</code> or <code>M--</code>) is used, then it opens the remote GitHub hosted raw PDF instead. If the <code>pel-flip-help-pdf-arg</code> user-option is set it's the other way around.
