

# Rocky Linux 8 Linux Desktop Keys on macOS Host

Ubuntu Desktop Keyboard Shortcut	Description
<p>The key sequences are described using the same format used by <a href="#">Rocky Linux</a>.</p>	<p>This table describes the keyboard shortcuts enabled on Rocky Linux 8 running under Parallel Desktop VM under a macOS host.</p> <ul style="list-style-type: none"> <li>The keys shortcuts were selected to prevent clash with Emacs and often used macOS desktop shortcuts. The shortcuts do <b>not</b> correspond to the default.</li> </ul> <p>⚠ Some of the Rocky Linux key bindings may some clash with macOS keyboard shortcuts. I normally disable the ones I do not use and remap others that clash wit macOS or Emacs.</p> <ul style="list-style-type: none"> <li>The binding shown below do not clash with macOS nor Emacs in terminal mode.</li> </ul>
<b>Desktop Specific Shortcuts</b>	The following shortcuts affect all Ubuntu GUI windows
