<b>Writing Tools</b>  See also: <a href="#">📖 Spell Checking</a>	Several external packages provide supplemental writing tools to what Emacs already provides.		
	PEL installs the following external packages when their corresponding pel-use- customizable user-option is turned on (set to <b>t</b> ):		
	 <a href="#">artbollocks-mode</a>	 <a href="#">pel-use-artbollocks-mode</a>	A minor mode to avoid clichés and bad grammar
	 <a href="#">harper-ls</a>	 <a href="#">pel-use-harper-ls</a>	A minor-mode to use Harper, a locally hosted, privacy-first, fast, open-source grammar checker. 👉 You must manually <a href="#">install the harper-ls server</a> on your system.
	 <a href="#">my-whisper</a>	 <a href="#">pel-use-my-whisper</a>	Speech-to-text via the <a href="#">Whisper.cpp</a> port of OpenAI Whisper model. 👉 You must manually <a href="#">install Whisper.cpp and other dependencies</a> on your system.
	 <a href="#">wc-mode</a>	 <a href="#">pel-use-wc-mode</a>	The wc-mode minor mode counts words with optional word-count goal.
	 <a href="#">writegood-mode</a>	 <a href="#">pel-use-writegood-mode</a>	A minor mode to aid in finding common writing problems.
	 <a href="#">writeroom-mode</a>	 <a href="#">pel-use-writeroom-mode</a>	A minor-mode that implements distraction-free writing mode.
 <a href="#">gt</a>	 <a href="#">pel-use-go-translate</a>	Text translator, supports multiple engines: google, Bing, deepL, StarDict, Youdao & LLMs ChatGPT, DeepSeek, etc..
