

🚧 Emacs support for the Algol68 Programming Language 🚧

| Description | Keystroke | Function | Note |
|---|--|--|--|
| Algol68 Editing | | PEL supports Algol68 via algol68-mode when <code>pel-use-algol</code> is t. PEL does not support a tree-sitter mode for Algol. PEL also provides: <ul style="list-style-type: none"> Speedbar support for Algol files listing functions and some types. IMenu is supported by algol68-mode. | |
| Last updated on: | 2026-01-17 | PEL supports for the Algol programming language is an early implementation not yet fully documented. | |
| Open this PDF file. See also: Help/Info | <p><code><f11> SPC 8 <f1></code> (pel-help-pdf &optional OPEN-WEB-PAGE)</p> <p><code><f12> <f1></code></p> | | Open the PEL - Algol local PDF. If the prefix argument (like C-u or M--) is used, then it opens the remote GitHub hosted raw PDF instead. If the <code>pel-flip-help-pdf-arg</code> user-option is set it's the other way around. |
| Customize PEL Algol support | <p><code><f11> SPC 8 <f2></code> (pel-customize-pel &optional OTHER-WINDOW)</p> <p><code><f12> <f2></code></p> | | Customize PEL Algol support. <ul style="list-style-type: none"> If OTHER-WINDOW is non-nil (use C-u), display in another window. |
| Customize Emacs Algol support | <p><code><f11> SPC 8 <f3></code> (pel-customize-library &optional OTHER-WINDOW)</p> <p><code><f12> <f3></code></p> | | Customize Emacs Algol support: zig-mode <ul style="list-style-type: none"> If OTHER-WINDOW is non-nil (use C-u), display in another window. |
| Show PEL setup for Algol68 buffer | <code><f11> ? /</code> | (pel-mode-setup-info &optional APPEND) | Display Algol setup information inside a *pel-mode-info* buffer with buttons providing quick access to the customization buffer of each variable shown. <ul style="list-style-type: none"> To append information in the buffer instead of clearing the previous content type any prefix argument (such as C-u) before the command keystroke. |
| Comments | | | |
| Toggle display of comments in buffer or active region See also: Comments | <code><f11> ; ;</code> | (hide/show-comments-toggle &optional START END) | Toggle hiding/showing of comments in the active region or whole buffer. <ul style="list-style-type: none"> If the region is active then toggle in the region. Otherwise, in the whole buffer. <p> This requires the <code>hide-comnt.el</code> package (see Comments).  PEL activates it when the <code>pel-use-hide-comnt</code> user option is t.</p> |
