Object Files Inspection

Description	<u>Keystroke</u>	Function	<u>Note</u>
inspecting Object Files	Emacs does not have explicit support for inspecting the content of object files. However, the following external packages can be used to inspect the content of some object file formats:		
This page is a placeholder, showing which modes can be activated with PEL.	• ELF	ignition elements with the second elements wit	pel-use-elf-mode set to t activates it.
	• Intel Hex	intel-hex-mode	pel-use-intel-hex-mode set to t activates this mode.
Use C-h m in those modes to see the bindings.			pel-intel-hex-activates-minor-modes allows specifying other minors modes activated for .hex files.
