macs support for Ada

Description	<u>Keystroke</u>	Function	Note	
Ada Editing	Emacs does not provide any built-in mode for Ada programming language. To activate support for Ada support on PEL, the pel-use-ada user-option must be turned on (set to t). When pel-use-ada is turned on the <f11> SPC A prefix is made available, corresponding to the <f12> prefix inside Ada buffers.</f12></f11>			
	PEL provides support for Ada via: The <u>ada-mode</u> external package is required. PEL installs and activates it when the <u>pel-use-arc-mode</u> or the <u>pel-use-ada</u> user-options is turned on.			
	Ada files use the .adb and .ads file extension. PEL adds Ada support for <u>Speedbar</u> when the pel-use-speedbar user-option is turned on.			
	EL support for Ada is not complete. The <f12> key is not always available. More commands should be provided and documented. and investigation is required.</f12>

Open this PDF file. See also: <u>∑ Help/</u> Info	<f11> SPC A <f1></f1></f11>	(pel-help-pdf &optional OPEN-WEB-PAGE)	Open the <u>\$\mathbb{N}_{\text{I}} - Ada</u> local PDF. If the prefix argument (like C-u or M) is used, then it opens the remote GitHub hosted raw PDF instead. If the pel-flip-help-pdf-arg user-option is set it's the other way around.	
	<f12> <f1></f1></f12>			
∑ Customize PEL Ada support	<f11> SPC A <f2></f2></f11>	(pel-customize-pel &optional OTHER-WINDOW)	Customize PEL Ada support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
	<f12> <f2></f2></f12>			
∑ Customize Emacs Ada support	<f11> SPC A <f3></f3></f11>	(pel-customize-library &optional OTHER-WINDOW)	Customize Emacs Ada support: ada • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
	<f12> <f3></f3></f12>			
Comments				
Toggle display of comments in buffer or active region See also: ∑	<f11> ; ;</f11>	(hide/show-comments-toggle &optional START END)	Toggle hiding/showing of comments in the active region or whole buffer. • If the region is active then toggle in the region. Otherwise, in the whole buffer. • This requires the hide-comnt.el package (see Ecomments). Ecomments). ECOMMENTS PEL activates it when the pel-use-hide-comnt user option is t.
