Customizing Emacs with PEL

<u>Operation</u>	<u>Keystroke</u>	Function	<u>Note</u>
PEL: Control Emacs via Easy Customization	customization system. This table shows how to quick buffers that operate in the Cus The first section shows navi	ly gain access to the customized d stomize mode with special key bind gation commands available inside	ad of having to write Emacs Lisp code, you use Emacs easy-to-use ata using commands that open buffers that show the customized data inside ings to speed up operation in that mode. a buffer that shows customized data (also called user options). buffers in Customization Mode to manage user options of interest.
	PEL - Configuration through Customization • PEL provides a growing set of customization groups and user option variables that control several aspects of Emacs: • The "pel-use-" activation user options identify what built-in or external Emacs Lisp package to use. PEL has logic to autoload the only when you need them. This way your Emacs will start quickly even if you have identified a large number of packages. • Once a package or feature is activated with the "pel-use-" user option, the other options control different behaviour of the activate. Some once you have modified the configuration, execute M-x pel-init. PEL will activate the new configuration.		or external Emacs Lisp package to use. PEL has logic to autoload the packages uickly even if you have identified a large number of packages. ser option, the other options control different behaviour of the activated package
Open this PDF file. See also: Melp/Info	<f11> <f2> <f1></f1></f2></f11>	(pel-help-pdf &optional OPEN- WEB-PAGE)	Open the local copy of the <u>S Customize</u> PDF file unless a command prefix (like C-u) was used. In that case it opens the Github-hosted file instead.
Customization Data	By default Emacs stores the customization data inside the Emacs init.el file, along with your other configuration, as Lisp code inside a custom set-wariable form. • When using PEL, and perhaps even if you're not, it's best to have Emacs store this data inside a <i>separate file</i> that you can put under VCS control independently from your init.el file. PEL promotes storing it inside the file ~/.emacs.d/emacs-customization.el . • Store the following Emacs Lisp code snippet inside your init.el file to do so: (setq custom-file "~/.emacs.d/emacs-customization.el") (load custom-file) • When using PEL, that code must be located before the call to pel-init. • The use of a file to store Emacs customization data separate from the Emacs init.el file provides another degree of freedom and flexibility. It becomes possible to easily distribute a configuration to several computers (or even users) without sharing more private information that can kept inside the init.el file.		
Customize Mode	This section describes comma commands described in the se		Customize-mode showing the various user options you got access to using the
Move to Avy/Ace target See also: <u>∑ Navigation</u>	o	(ace-link-custom)	 Highlight each target with an Avy/Ace single or double letter target. Type the letter(s) to move to that position. This is a very efficient and quick navigation mechanism. Requires ace-link external package PEL downloads, installs and activates it when the pel-use-ace-link user option is set to t.
Apply customization changes	C-c C-c	(Custom-set &rest IGNORE)	Set the current value of all edited settings in the buffer.
Apply and Save customization changes	C-x C-s	(Custom-save &rest IGNORE)	Set all edited settings, then save all settings that have been set. • If a setting was edited and set before, this saves it. If a setting was merely edited before, this sets it then saves it.
Quit Customization and close buffer	q	(Custom-buffer-done &rest IGNORE)	Exit current Custom buffer according to 'custom-buffer-done-kill'.
Browse customize data tree	The following commands create a tree browser for the customize hierarchy inside a "Customize Browser" buffer. Each node can we expanded down to a single options and any can be collapsed. Note that PEL's customization groups and options are all always available contrary to the ones that will be available in the Emacs group because the Emacs group contains only what is currently loaded and the PEL one is always loaded.		
Browse complete customize data tree from root: Emacs	<f11> <f2> B</f2></f11>	(customize-browse &optional GROUP)	Open the customize tree bowser for the entire Emacs customization data already loaded. • Unfortunately this command does not prompt it always opens the tree from the root. To specify a group use the command shown below. • Emacs is only able to show information it knows about. Customization data defined in files not loaded will not be accessible.
Browse customize data tree from specified group	<f11> <f2> b</f2></f11>	(pel-browse-group GROUP)	Browse the customization tree from a specific group node. • Prompts for a group name. Supports tab completion. • All PEL groups have a name that starts with "pel-". ⚠ Emacs is only able to show information it knows about. Customization data defined in files not loaded will not be accessible. All of PEL data is always loaded. • ⑤ The pel-customize-library commands available as the <f3> key of PEL key prefixes does not suffer from this problem: it will detect that the library is not loaded and will prompt you for loading it, giving you access to the customization buffer when you need it. The information is available in the various PDF pages at the top of each page.</f3>
Browse PEL customize data tree	<f11> <f2> P B</f2></f11>	(pel-customize-browse)	Open the customize tree bowser for the entire PEL customization data (which is under Emacs/Convenience.
Emacs Easy Customization	customization buffer and then specific customization group a always use completion by typi Several of the commands belo are already loaded. If you set the OTHER-WIND example if you open the PE are loaded. Each group will Luntil a package is load group, first load the packag Solve Note however that the PE	you can search or browse what you and the third one at a specific user on search and the third one at a specific user on search at any point to get a list ow open the PEL customization grown open the PEL customization grown. OW argument, the command open L group for grep with C-u <f11> open inside its own bugger and the led its customization group is unle evia one of its command that is au EL commands that open customization do load the related library to enable</f11>	ze-mode to customize anything of interest. With the first command you open the u want to customize. The second command allow you to open the buffer at a potion. These commands prompt for the information you are looking for. You can of available groups or variables. up and one or several other groups related to the same topic, when these groups s the buffer in another window and also open any group related that exists. For ff2> g , this will also open the grep group, the rg and ripgrep groups if they a command will create the necessary windows.
Customize Emacs	<f11> <f2> c</f2></f11>	(customize)	Select a customization buffer which you can use to set user options. User options are structured into "groups". Initially the top-level group 'Emacs' and its immediate subgroups are shown; the contents of those subgroups are initially hidden. Emacs is only able to show information it knows about. Customization data defined in files not loaded will not be accessible.

<u>Operation</u>	<u>Keystroke</u>	Function	<u>Note</u>
Customize a specific group	<f11> <f2> g</f2></f11>	(customize-group &optional GROUP OTHER-WINDOW)	Customize GROUP, which must be a customization group. • If OTHER-WINDOW is non-nil (use C-u), display in another window. • This command provides completion and you can use it to detect groups. ⚠ Emacs is only able to show the name names of groups that are defined in files that have already been loaded. You won't be able to open a group that is not already loaded. • ☐ The pel-customize-library commands available as the <f3> key of PEL key prefixes does not suffer from this problem: it will detect that the library is not loaded and will prompt you for loading it, giving you access to the customization buffer when you need it. The information is available in the various PDF pages at the top of each page.</f3>
Customize a user option	<f11> <f2> o</f2></f11>	(customize-option SYMBOL)	Customize SYMBOL, which must be a user option. • As with groups, Emacs provides completion for user options, allowing you to detect user options. • Emacs is only able to show the name names of user options that are defined in files that have already been loaded. You won't be able to open a group that is not already loaded. But see the notice in the above cell.
Activate and cleanup your packages using PEL customization user- variables	customization groups. The p PEL also removes the packa Use a key prefix for this co PEL does not delete pack from the directories later. The elpa packages are The elpa attic is iden On a Unix-like syster The non-elpa files are s identified by the user-e By default, on Unix-l On Windows system the odirectories can be located	allation and configuration of the pace packages missing are installed when ges that are not required by the PEI ormand to perform a dry-run of the ages. Instead it places them into so stored in the directory identified by tiffied by a name that appends "-attent that would normally be "-/.emace tored in the directory identified by twacs-directory. Its attic directory like systems the directories are "-/.e directories are located in your User of somewhere else.	ckages supported by its pel-use- user-options controlled by the PEL n you start Emacs or when you explicitly run the pel-init command. L user-options when you issue the pel-cleanup command. e command and produce a report of what would be removed. eparate directories, called "attic" directories. You can then retrieve the package of package-user-dir or in the "elpa" directory inside the user-emacs-directory . ic" to the above directory name. s.d/elpa" and "-/.emacs.d/elpa-attic". he pel-utils-dirname user-options (which defaults to "utils") inside the directory name is the same name with a "-attic" suffix. emacs.d/utils" and "-/.emacs.d/utils-attic". directory, as controlled by Emacs. Also on Emacs 27.1 and later these located in the same user-emacs-directory .
Re-initialize PEL, activate the new PEL user-option, install packages newly requested	M-x pel-init	(pel-init &optional CACHED- ABBREV-FILE-NAME)	Re-initialize PEL. Download, install and configure any package requested by the various pel-use- user-options that have not yet been installed. Does not remove anything. Use pel-cleanup for that. The argument is not accessible interactively and exists for the initial Emacs startup only.
Show PEL user option and package info See also: Help/Info	<f11> ? e ?</f11>	(pel-package-info &optional FULL-REPORT)	Display the following information in the echo area: • The number of PEL user-options, and the number of them that are active. • The number of Elpa packages active: the count of the ones directly installed because of active PEL user-options and the count of them installed as dependencies of the first group. • The number of Emacs Lisp files stored in the ~/.emacs.d/utils (or equivalent directory) as a result of PEL user options. • With optional argument, generates a full report with much more details in a *pel-user-options* report buffer. Any key prefix works. M <f11>? e ? for example.</f11>
Disable all packages not requested by PEL user-options and not identified as dependency or packages that must be kept. Update the load path and the customization file content.	M-x pel-cleanup	(pel-cleanup &optional DRY-RUN)	After prompting for a confirmation, de-activates all Elpa and non-Elpa packages that are not requested by a PEL user-option. The command keeps packages that are dependencies of packages required by PEL user-options and packages that PEL always requires. It also keeps packages that you have identified as manually installed in the following user options: • pel-elpa-packages-to-keep • pel-utils-packages-to-keep • Pel utils-packages-to-keep Are for the current version of PEL when you install an Emacs package with the Emacs package system, PEL does not automatically add the package name in the pel-elpa-packages-to-keep user-option. If you want to keep that package and configure it yourself with your own Emacs Lisp code invoked by your init.el file, add the package symbol name to the list of pel-elpa-packages-to-keep otherwise pel-cleanup will move the package to the elpa-attic.
Perform a dry-run of pel- cleanup. Generate a detailed report.	M M-x pel-cleanup		Runs pel-cleanup in dry-mode and produce a detailed report of what pel-pel-cleanup would remove in a *pel-cleanup* buffer.
Input Completion Mode Selection See also: Completion/Input	PEL supports several input completion modes that kick in with the M-x, C-x b, C-x C-f, <f1> o and many other commands. PEL supports the following input completion modes: 1. Emacs' default tab completion 2. Helm mode completion 3. Ido mode completion 4. Vy mode completion 5. Vy mode completion 6. Ido/Helm mode where Ido is used for dealing with Files and buffers and Helm is used everywhere else (including all Helm specific commands). • Use <f11> <f2> M-c, to customize the PEL completion group user options above. • Set the pel-initial-completion-mode user option to select which completion mode is used when Emacs starts. As soon as one of the extra completion mode is activated via the corresponding pel-use- user option, PEL makes the following commands available to change the completion mode and to see which one is currently active.</f2></f11></f1>		
Select the completion mode	<f11> M-c</f11>	(pel-select-completion-mode)	Prompt user for completion mode to activate. The available modes depend on
Show what completion mode is currently used.	<f11> ? M-c</f11>	(pel-show-active-completion-mode)	what is currently activated by customization. See the list above. Display the completion mode currently used.
Search Tools Selection See also: Search/Replace	PEL supports several search tools that impact the way the C-s command operates. PEL supports the following search tools: • Emacs' default ISearch • Manzu, ISearch with match count • Swiper search with overview match list • Swiper search with overview match list • Striper search with overview match list • Striper search to customize the PEL completion group user options above. • Set the pel-initial-search-tool user option to select which search tool is used when Emacs starts. As soon as one of the extra search tool is activated via the corresponding pel-use- user option, PEL makes the following commands available to change the currently used search tool and to see which one is currently active.		
Show which search tool is currently used	<f1> ? s</f1>	(pel-show-active-search-tool)	Display the currently used search tool.
currently used		2	

<u>Operation</u>	<u>Keystroke</u>	Function	Note
Select search tool to use	<f11> s s</f11>	(pel-select-search-tool)	Prompt user for search tool to use with C-s . Show new active one.
			• Emacs normally maps the search-forward command to C-s .
			PEL provides the ability to activate the following tools that can be activated for searching:
			• The Anzu external package activated by pel-use-anzu user option.
			Anzu provides a match count in the mode line when search command is used.
			Wight have a surprised by the surpr
			in the mini-buffer.
			• Subset the <f11> s <f2> command to open the PEL search customize group and set the pel-initial-search-tool user option to identify which tool</f2></f11>
			is used when Emacs starts.
			Seing able to search using either Emacs default ISearch (see below) and Swiper helps as they are both very useful in different scenarios.

Customize Specific Emacs Groups.	PEL provides several key bindings to open customization groups of Emacs built-in or external package. PEL will prompt you to load their specific file if they are not loaded. Most of the key bindings are mapped into the PEL key prefixes as the <f3> key member. For example to open auto-completion related groups you can use the <f11> , <f3> key sequence. These are not listed here. PEL does not provide key prefixes for all Emacs concepts. It provides, however some key bindings to access the customization buffer for some of those. They are listed just below, here:</f3></f11></f3>		

<u>Operation</u>	<u>Keystroke</u>	Function	<u>Note</u>
Permanently change the cursor's color See also: <u>See Cursor</u>	<f11> <f2> E C-c</f2></f11>	(pel-customize-cursor &optional OTHER-WINDOW)	Quicks access to the customize buffer to set the cursor default color. It sets the color permanently if the customization is saved. Only available in graphics mode.
locate	<f11> <f2> E 1</f2></f11>	(pel-cfge-locate &optional OTHER-WINDOW)	Customize locate. With C-u , display in another window.
man	<f11> <f2> E m</f2></f11>	(pel-cfge-man &optional OTHER-WINDOW)	Customize man. With C-u , display in another window.
browse-url	<f11> <f2> E u</f2></f11>	(pel-cfge-browse-url &optional OTHER-WINDOW)	Customize browse-url. With C-u , display in another window.
webjump	<f11> <f2> E j</f2></f11>	(pel-cfge-webjump &optional OTHER-WINDOW)	Customize webjump. With c-u , display in another window.
woman	<f11> <f2> E w</f2></f11>	(pel-cfge-woman &optional OTHER-WINDOW)	Customize woman. With c-u , display in another window.
Customize Emacs Libraries	The following key bindings almost all use the same PEL command: (pel-customize-library & optional OTHER-WINDOW). The command detects the key sequence that invoked it to select the customization group to open. If there are more than one it prompts for the one to open. If a group is not loaded, PEL prompts for loading it. If the related package is not installed PEL print a warning message. • For external packages you can use the same key sequence except for the last key: replace <f3> by <f2>: that sequence will open the PEL configuration buffer for the same topic. From that you will find the PEL option variable to activate the external package. • All of these commands open the buffer inside another window if a prefix argument (like C-u) is typed first.</f2></f3>		
<u></u> Align	<f11> t a <f3></f3></f11>	Customize Emacs text alignment s	support: open the align group.
∑ Auto-Completion	<f11> , <f3></f3></f11>	Customize Emacs auto-completion	n support: auto-complete, company and hippie-expand.
<u>∑ Bookmarks</u>	<f11> ' <f3></f3></f11>	Customize Emacs bookmark grou	p which includes: bookmark and bm.
<u> ∑ Buffers</u>	<f11> b <f3></f3></f11>	Customize Emacs support for buff	er management: Buffer-menu, buffer, minibuffer, hexl, nhexl.
<u>∑ Comments</u>	<f11> ; <f3> 1</f3></f11>	Customize Emacs support for com	nments: comment, hideshow.
Customization Control	<f11> <f2> <f3></f3></f2></f11>	Customize Emacs customization of	control.
<u></u> Hide/Show	<f11> ; <f3> 2</f3></f11>	Customize Emacs support for con	nments: comment, hideshow.
Input Completion:	<f11> <f2> P M-c</f2></f11>	(pel-cfg-pkg-completion	Customize Emacs Input Completion support: helm, ido, ivy, counsel
∑ Completion/Input ∑ Cursor	<f11> m <f3></f3></f11>	&optional OTHER-WINDOW) Customize Emacs support for curs	If OTHER-WINDOW is non-nil (use C-u), display in other window. sor and multiple-cursors.
∑ Diff & Merge - ediff	<f11> d e <f3></f3></f11>	Customize Emacs ediff.	•
<u>∑M Dired</u>	<f11> f <f3> 2</f3></f11>		d, directory editor. Other choices are available for neotree and ztree.
∑ Enriched Text	<f11> t e <f3></f3></f11>	Customize Emacs Enriched Text s	•
∑ File-mngt	<f11> f <f3> 1</f3></f11>	Customize Emacs support for file	
∑ File-mngt - auto-revert	<f11> f r <f3></f3></f11>	Customize Emacs support for file	
∑ File-mngt - ffap	<f11> f a <f3></f3></f11>		
∑ File-mngt - dir. tree browser	<f11> B <f3></f3></f11>	Customize Emacs support for management of ffap (find file at point). Customize directory tree browsers: treemacs, ztree	
∑ File-mngt - NeoTree	<f11> B N <f3></f3></f11>	,	<u>'</u>
∑ Filling/Justification	• <f11> t f <f3> • <f11> t j <f3></f3></f11></f3></f11>	Customize NeoTree directory browser Customize Emacs fill and justification control.	
	<f11> F <f3></f3></f11>	Customize Emacs frame managen	nent support.
∑ Grep	<f11> g <f3></f3></f11>	Customize Emacs grep support. (Groups: grep, ag, rg, ripgrep, wgrep.
∑ Highlight	<f11> h <f3></f3></f11>	Customize Emacs grep support. Groups: grep, ag, rg, ripgrep, wgrep. Customize Emacs support for buffer highlight management: auto-highlight, edit, rainbow-delimited, line, fill-	
		column-indicator (for Emacs version earlier than 27.1)	
<u>∑ Indentation</u>	<f11> <tab> <f3></f3></tab></f11>		pens the indent customization group.
∑ Inserting Text	<f11> i <f3></f3></f11>		upport: lice, smart-dash, tempo, time-stamp, yasnippet
<u> ▼ Keyboard Macros</u>	<f11> k <f3></f3></f11>	Customize the Emacs keyboard macro external package support: kmacro, centimacro.	
∑ Keyboard Macros	<f11> k e <f3></f3></f11>	•	acro external package support: emacros.
∑ Keyboard Macros	<f11> k 1 <f3></f3></f11>	•	acro external package support: elmacro.
<u>∑ Key-Chords</u>	<f11> <f5> k <f3></f3></f5></f11>	Customize Emacs support for visu	
Line Mngt: <u>∑ Display - Lines</u>	<f11> 1 <f3></f3></f11>	Customize Emacs support for visu	iai-iii i c .
<u></u> Menus	<f11> <f10> <f3></f3></f10></f11>	Customize Emacs menu mechanis	sms.
Navigation	<f11> <f2> P n 2</f2></f11>	(pel-cfg-pkg-navigation &optional OTHER-WINDOW)	Customize Emacs navigation tools support: avy. • If OTHER-WINDOW is non-nil (use C-u), display in another window.
∑ Projectile	• <f11> <f8> <f3> • <f8> <f3></f3></f8></f3></f8></f11>	(pel-customize-projectile)	Open the projectile customization group where you can modify projectiles configuration. Key sequence <f11> <f8> <f3> is available if pel-use-projectile is t. Key sequence <f8> <f2> is available when the projectile mode is on. Available when the projectile external package is activated by PEL with the pel-use-projectile user option is non-nil.</f2></f8></f3></f8></f11>
Regular Expression ∑ Search/Replace	<f11> s x <f3></f3></f11>	Customize Emacs regular express	ion support: rxt, re-builder, visual-regex.
∑ Scrolling	<f11> <f3></f3></f11>	Customize Emacs Scrolling suppo	rt groups: follow, smooth-scrolling.
∑ Search/Replace	<f11> s <f3></f3></f11>	Customize Emacs Search support: search, anzu, swiper, iedit.	
<u>∑ Sessions</u>	<f11> S <f3></f3></f11>	Customize Emacs Session suppor	t: desktop.
<u></u> Shells	<f11> x <f3></f3></f11>	Customize Emacs Shells support groups: term, terminals, vterm.	
∑ Speedbar	<f11> M-s <f3></f3></f11>	Customize Emacs Speedbar support.	
∑ Spell Checking	<f11> \$ <f3></f3></f11>	Customize Emacs spelling suppor	t. Opens the following customization groups: ispell, flyspell.
<u>∑ Xref</u> - cross reference	<f11> X <f3></f3></f11>	Customize Emacs cross-reference support: ctags/etags/gtags	
<u>∑ Text Modes</u>	<f11> t m <f3></f3></f11>	Customize Emacs text mode group: glasses	
Text <u>∑ Whitespace</u>	<f11> t w <f3></f3></f11>	Customize Emacs handling of whitespaces.	
<u></u>	outsimize Emilies mariening of wintespaces.		

<u>Operation</u>	<u>Keystroke</u>	Function Note	
<u>∑ vcs</u>	<f11> v <f3></f3></f11>	Customize Emacs Version Control System support: vc, vc-hg, vc-git, magit, monky.	
∑ Undo/Redo/Repeat/Arg	<f11> u <f3></f3></f11>	Customize Emacs undo support: undo, undo-tree.	
<u></u> <u>Windows</u>	<f11> w <f3></f3></f11>	Customize Emacs Window support groups: windows, ace-window, ace-window-display, winner, windmove.	
Yasnippet ∑ Inserting Text	<f11> y <f3></f3></f11>	Customize Yasnippet groups: yasnippet, yasnippet-snippets, yas-minor	
Configure Emacs Programming Language support	The following commands opens the Emacs configuration group to configure Emacs support for the specified programming language. • The <f11> SPC key prefixes are available globally (for all buffers). • The <f12> <f3> key is only available when point is in a buffer for one of the languages supported by PEL and open the Emacs customization group for the programming language for the current buffer. Support that might not even be loaded: PEL will detect if the corresponding library is loaded and will prompt you asking if you want to load it first, allowing Emacs to open the customization buffer.</f3></f12></f11>		
AppleScript & text audio narration	<f11> SPC a <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Applescript support. • If OTHER-WINDOW is non-nil (use C - u), display in another window.	
<u> 19ι - C</u>	<f11> SPC c <f3></f3></f11>	Customize Emacs C support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
ВІ - С++	<f11> SPC C <f3></f3></f11>	Customize Emacs C++ support: cpp. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u> 191 - D</u>	<f11> SPC D <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs D support: d-mode. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
្នម្នា - Emacs Lisp	<f11> SPC 1 <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Elisp support: checkdoc, editing-basics, elint, eldoc, eros, lisp, lispy, suggest. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u>⊈</u> βι - Emacs Lisp eldoc	<f11> SPC 1 ? <f3> <f12> <f3></f3></f12></f3></f11>	Customize PEL Elisp support: eldoc, eldoc-box. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
Bῖ - Common Lisp	<f11> SPC L <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Lisp support: lisp, lispy. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u>ֆῖ - Elixir</u>	<f11> SPC x <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Elixir support: alchemist, alchemist-iex. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
भ्रा - Erlang	<f11> SPC e <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Erlang support: erlang, erldoc, edts, auto-highlight-symbol. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
Bǐ - Forth	<f11> SPC f <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Forth support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u> ұл - Go</u>	<f11> SPC g <f3> <f12> <f2></f2></f12></f3></f11>	Customize Emacs Go support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u> ֆῖ - Julia</u>	<f11> SPC j <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Julia support: julia, julia-mode, julia-snail. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
β ί - Make	<f11> SPC M <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs makefile support: makefile. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
½ι - NetRexx	<f11> SPC N <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs NetRexx support: netrexx-mode • If OTHER-WINDOW is non-nil (use C - u), display in another window.	
<u> PI - Python</u>	<f11> SPC p <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Python support: python, python-flymake. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
Φί - REXX	<f11> SPC R <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs REXX support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
Configure PEL Markup support	The following commands opens the Emacs customization group related to configure Emacs support for the specific markup language. The <f11> SPC key prefixes are available globally (for all buffers). The <f12> <f3> key is only available when point is in a buffer for one of the languages supported by PEL and open the Emacs customization group for the markup language for the current buffer. When you use the <f11> SPC prefix, you can customize the Emacs language library support that might not even be loaded: PEL will detect if the corresponding library is loaded and will prompt you asking if you want to load it first, allowing Emacs to open the customization buffer.</f11></f3></f12></f11>		
<u></u> <u> M</u> Graphviz Dot	<f11> SPC M-g <f3> <f12> <f3></f3></f12></f3></f11>	Customize Emacs Graphviz-Dot support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u>Ŋ</u> PlantUML	• <f11> D u <f3> • <f11> SPC M-u <f3></f3></f11></f3></f11>	Customize Emacs PlantUML support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
<u> </u>	<f12> <f3> <f11> SPC M-r <f3></f3></f11></f3></f12>	Customize Emacs reStructuredText support. • If OTHER-WINDOW is non-nil (use C-u), display in another window.	
	<f12> <f3></f3></f12>	5
