		Last updated on:	2025-05-07		Note: with PEI	L, type < <u>f11> <f1></f1></u>	to open this PDF index.
Emacs Reference Cards		These are links to the PDF version of official Eng PEL documents Emacs key bindings as well, the		glish version of the quick reference cards for GN			
With PEL, access these cards from Emacs with the <f11> ? e r key sequence.</f11>		Emacs	Calc	Gnus	Magit Cheatsheet	Org	Viper
See <u>S Help/Info</u> for more info.	•	Emacs survival card		Gnus booklet	Magit Ref-card	<u> </u>	VIP
➤ PEL Overview PEL license		This table holds links to the PEL file tables (hosted on Github as raw PDF files).					
PEL repo PEL Readme PEL Manual PEL NEWS Discussions Last updated on: 2025-05-07 Emacs Mailing Lists		E For the best user experience, use a browser that can render PDF directly instead of downloading.					
		 Mozilla Firefox (version > 78) does that perfectly. You may need to activate a plug-in for other browsers. With that in place, you can browse through all the PDFs and reach a vast amount of information quickly. 					
		From within Emacs open this topic index PDF by typing the <f11> ? <f1> key sequence. More help topics with <f11> ? p keys.</f11></f1></f11>					
		degree The symbols, colour coding and various other conventions are described in the <u>▶Legend</u> PDF.

➤ Emacs Features • A Guided Tour of Emacs. • Awesome-Emacs • MELPA and GNU ELPA The tables listed at right describe Emacs commands & key bindings for concepts & features. The cell is light-blue for major mode, light-red for minor mode specific concepts. Grey cells are links into other pages for important concepts. Emacs commands can be executed by name or bound to key sequences. They describe the commands, their arguments and the key sequences bound to them. • Emacs Keys • Numeric Arguments You can also: • Run Command by Name		_	with only ∑ are Emacs o			_	stly PEL extensions.
