PEL Topics Index

Emacs Reference Cards			nglish version of the quicl nese cards provide usefu			external packages.
With PEL you can access these via the <f11>? e r key sequence.</f11>	Emacs	Calc	Gnus	Magit Cheatsheet	Org	Viper
See <u>Nelp/Info</u>	Emacs survival card	Dired	Gnus booklet	Magit Ref-card		VIP
PEL Overview PEL repo PEL Readme PEL Manual PEL NEWS	This table holds links to the PEL file tables. Each cell holds a hyperlink to the GitHub hosted raw PDF table. For the best user experience, use a browser that can render PDF directly instead of downloading. • Mozilla Firefox (version > 78) does that perfectly. You may need to activate a plug-in for other browsers. • With that in place, you can browse through all the PDFs quickly and reach a vast amount of information quickly. From within Emacs open this topic index PDF by typing the <f11> ? <f1> key sequence. More help topics with <f11> ? p keys. The symbols, colour coding and various other conventions are described in the ▶Legend PDF.</f11></f1></f11>

XRef - Cross Reference	Emacs supports various cross reference mechanisms described in the \(\subseteq \text{Xref} \) table. These mechanisms take advantage of various external tools and integrate with them. Notes about those tools are available in the tables listed in this section. \(\frac{\text{integrate}}{\text{with}} \) This is work in progress.					
Tools See also: <u>▼ Xref</u>	Xref-Support	Xref-Backend	ose tools are available in	the tables listed in this s	section. What This is work	in progress.
