For the best user experience, use a browser that can render PDF directly instead of downloading: all PDFs are heavily hyperlinked. • Mozilla Firefox (version > 78) does that perfectly. You may need to activate a plug-in for other browsers. From within Emacs open this topic index PDF by typing the f11> ? f1> keys sequence. More help topics with f11> ? p keys. The symbols, colour coding and various other conventions are described in the Legend PDF.
