Key bindings of commands with		ed completion mode	available for this c	ommand					
input completion	• • : Ido completion is available for this command, but only when the command symbol is placed in the ido-cr+-function-whitelist user-option.								
capable prompt	 • • : Uses Ido with last specified Ido geometry, even when ivy or helm mode is selected. • : enhanced completion mode is not available for this command. It only offers the Emacs default completion. 								
₩		ed completion mode appletion mode is no			nly offers the Emacs of	default completion.			
	• Ido : When I	do/Help mode is sel	ected: Ido mode us	sed here, supports all	I geometries				
		Ido/Helm mode is s t always start with the		de used nere eometry but works af	ter re-selecting the lo	lo geometry (need f	urther investigat	tion)
