pre-command-hook	Y: 26	See Command Overview.	
pre-redisplay-functions	Y: 26	See Forcing Redisplay.	Hook run in each window just before redisplaying it.

Hook Variable Name	Standard Hook Emacs version	Reference	
prefix-command-echo-keystrokes-functions	Y: 26	See Prefix Command Arguments.	An abnormal hook run by prefix commands (such as C-u) which should return a string describing the current prefix state. For example, C-u produces 'C-u-' and 'C-u 1 2 3-'. Each hook function is called with no arguments and should return a string describing the current prefix state, or nil if there's no prefix state.
prefix-command-preserve-state-hook	Y: 26		Hook run when a prefix command needs to preserve the prefix by passing the current prefix command state to the next command. For example, C-u needs to pass the state to the next command when the user types C-u or follows C-u with a digit.
resume-tty-functions	Y: 26	See <u>Suspending Emacs</u> .	
split-window-preferred-function	Y: 26	See Choosing Window Options.
