🚧 Emacs support for Arc 🚧

Description	Keystroke	Function	Note
Arc Editing See **Arc Home**	Emacs does not provide any built-in mode for **Arc** Lisp. 🔲 To activate support for Arc on PEL, the **pel-use-arc** user-option must be turned on (set to **t**). • When **pel-use-arc is** turned on the `<f11> SPC C-a` prefix is made available. PEL provides the following user-options to download and activate Arc supporting Emacs packages using the **arc-mode**. 📦 The **arc-mode** external package is required. 🔲 PEL installs and activates it when the **pel-use-arc-mode** user-options is turned on. Arc files use the .arc file extension. PEL adds Arc support for 🔲 Speedbar when the **pel-use-speedbar** user-option is turned on. 🚧 PEL support for Arc is not complete. More commands should be provided and documented.		
Last updated on:	2025-08-26		

Open this PDF file.
See also: 🔲 **Help/ Info**
	`<f11> SPC C-a <f1>`
	
	`<f12> <f1>`
		(pel-help-pdf &optional OPEN-WEB-PAGE)	Open the **PL - Arc** local PDF. If the prefix argument (like **C-u** or **M--**) is used, then it opens the remote GitHub hosted raw PDF instead. If the **pel-flip-help-pdf-arg** user-option is set it's the other way around.

🔲 **Customize** PEL Arc support	`<f11> SPC C-a <f2>`
	
	`<f12> <f2>`
		(pel-customize-pel &optional OTHER-WINDOW)	Customize PEL Arc support.
			• If OTHER-WINDOW is non-nil (use **C-u**), display in another window.

🔲 **Customize** Emacs Arc support	`<f11> SPC C-a <f3>`
	
	`<f12> <f3>`
		(pel-customize-library &optional OTHER-WINDOW)	Customize Emacs Arc support: arc, lispy.
			• If OTHER-WINDOW is non-nil (use **C-u**), display in another window.

Comments			
Toggle display of comments in buffer or active region See also: 🔲 **Comments**	`<f11> ; ;`	**(hide/show-comments-toggle** &optional START END)	Toggle hiding/showing of comments in the active region or whole buffer. • If the region is active then toggle in the region. Otherwise, in the whole buffer. 📦 This requires the **hide-comnt.el** package (see 🔲 **Comments**). 🔲 PEL activates it when the **pel-use-hide-comnt** user option is **t**.
