∑ Project Tools 🚧

Operation	Keystroke	Function	Note
Project Dev Tools ○ Help & Customization • find-file-in-project	Several external packages provide supplemental tools to deal with software projects inside Emacs. See also: ∑𝓧 **Projectile** Starting with Emacs 30, Emacs added tools to work with code projects. PEL installs and activate the following external packages when the corresponding **pel-use-** user-option is turned on: 📦 **find-file-in-project** 🔲 **pel-use-find-file-in-project** Find files in project. This project is a little flaky. Prefer ∑𝓧 **Projectile**		
Last updated on:	2025-12-09		
Open this PDF file. See also: ∑ **Help/Info**	**`<f11> p <f1>`**	**(pel-help-pdf** &optional OPEN-WEB-PAGE)	Open the ∑ **Project Tools** local PDF. If the prefix argument (like **`C-u`** or **`M--`**) is used, then it opens the remote GitHub hosted raw PDF instead. If the **pel-flip-help-pdf-arg** user-option is set it's the other way around.
∑ **Customize** PEL project support	**`<f11> p <f2>`**	**(pel-customize-pel** &optional OTHER-WINDOW)	Customize PEL project tools support: pel-pkg-for-project, including projectile and treemacs. • If OTHER-WINDOW is non-nil (use **`C-u`**), display in another window.
∑ **Customize** Emacs project support	**`<f11> p <f3>`**	**(pel-customize-library** &optional OTHER-WINDOW)	Customize Emacs project tools support: find-file-in-project • If OTHER-WINDOW is non-nil (use **`C-u`**), display in another window.
Find file in project	**`<f11> p f f`**	**(find-file-in-project-by-selected** &optional OPEN-ANOTHER-WINDOW)	Prompt for file glob, search in project for the file. ⚠️ This code is weak and breaks often. Prefer the much better alternative: ∑𝓧 **Projectile** and PEL specific file management commands that provide lots of functionality. See ∑ **File-mngt** and the language specific pages.
