F12	F12	• In fundamental-mode for some PEL supported programming major-modes that support creating shell scripts, mapped to the **pel-as** command. See 𝄞 - D , 𝄞 -Lua, 𝄞 - Nim, 𝄞 - Pike, 𝄞 - *Python*, 𝄞 - Ruby, 𝄞 -Seed7, 𝄞 - Tcl, and 𝄞 - UNIX Shell. • In PEL supported programming major-mode, also act as a *prefix* key for **tempo skeletons** (see **T Templates**) in some modes: 𝄞 - C , 𝄞 - C++, 𝄞 - Emacs Lisp , 𝄞 - Erlang, 𝄞 reStructuredText	*unassigned*	*unassigned*	*unassigned*	*unassigned* ➢ *F11 F60*	*unassigned*	*unassigned* ➢ *~*	*unassigned* ➢ *~*

Special Legend for the above table

The colour and symbols used in the above table follow the standard legend described in ➢**Legend** with the additional conventions listed here.	
cell background colour	The background colour of the cell identifies the type of command. For example, the cell of `<f12> <up>` uses the background colour of a navigation command. • Some key sequences, like <f12> <f4>, are used as major-mode specific prefix to setup and help commands. The background of these cess uses a gradient color of the setup and help.
cell foreground colour	The cell lists the commands being used by the various major modes. The color of the commands is similar to the command colours used in all other tables: it identifies the *provider* of the command: • **black** : standard Emacs command • **blue**: command provided by an external package • **green**: command provided by PEL
unassigned	The key is not assigned by PEL.
unassigned	The key with this modifier is not accessible, and does not do anything, in terminal mode.
