- **PEL Readme**
- **PEL Manual**

This table holds links to the PEL tables. Each cell holds a hyperlink to the GitHub hosted raw PDF table.
👆 For the best user experience, use a browser that can render PDF directly instead of downloading.
  - Firefox does that. You may need to activate a plug-in for other browsers.
  - With that in place, you can browse through all the PDFs quickly and reach a vast amount of information.
👆 From within Emacs open this topic index PDF by typing the `<f11> ? <f1>` key sequence.
👆 The symbols, colour coding and various other conventions are described in the ➢**Legend** PDF.

∑ Emacs Features

These PEL tables describe the Emacs commands and key bindings for generic concepts and features.

Emacs uses a concept of modes. See:
- **Emacs Major and Minor Modes**
  - **Major Modes**
  - **Minor Modes**
  - **Choosing Modes**

PEL provides several key sequences to toggle minor modes, described in the relevant PDFs.

Emacs commands can be executed by name or bound to key sequences. The commands may have arguments and keys can express them. See:
- **Emacs Keys**

The links that start with only ∑ are built-in Emacs, the links that use the ∑M prefix are external packages.

Build Tools

PEL has support for several build tools but they are not all documented in a page.
Aside from the list below, PEL supports installation and partial setup of the following tools:
- **Nix** 📦 Requires **nix-mode** external package ☑ activated when **pel-use-nix-mode** user-option is tuned on.
- **Tup** 📦 Requires **tup-mode** external package ☑ activated when **pel-use-tup** user-option is tuned on.
