Special Legend for the above table

The colour and symbols used in the above table follow the standard legend described in >Legend with the additional conventions listed here.	
unassigned	The key is not assigned by PEL.
unassigned	The key with this modifier is not accessible, and does not do anything, in terminal mode.
unassigned >	When pressing this key with this/these modifier(s) in terminal mode the action corresponds to the key identified after the > symbol.
pel:projectile	A PEL prefix key. Some of the prefix keys are always available, some others are only available when their corresponding PEL user-option is activated.
complete-symbol	Emacs native command bound to the key
pel-duplicate-line	Emacs command provided by PEL
pel-toggle-frame-fullscreen	A command that is available when Emacs runs in graphics mode but that is not available or displays something else when Emacs operates in terminal (TTY) mode.
spdx-insert-spdx	Command provided by external package. Must be activated via corresponding PEL user-option for key to be available.
 PEL Environment Variables	The command opens a PEL PDF
