

Emacs support for editing Nix files ⚠️

Description	Keystroke	Function	Note
Nix Last updated on: 2026-09-19	Emacs does not support the Nix build system file editing natively. PEL provides supports via the Requires nix-mode external package 📦 Requires nix-mode external package 🔗 activated when pel-use-nix user-option is tuned on. More information about nix-mode: nix-mode @ Github nix-mode manual @ Github		
Open this PDF file. See also: 🔗 Help/Info	<f12> <f1>	(pel-tup-help & optional OPEN-WEB-PAGE)	Open the 🔗 - Nix local PDF. With C-u , M-- , M- -1 or C- -1 prefix: open the remote GitHub hosted PDF instead. If the pel-flip-help-pdf-arg user-option is set it's the other way around.
Comments			
Insert, realign, comment/ uncomment region See also: 🔗 Comments With PEL: Comment the current line with M-0 M-;	M- ;	(comment-dwim ARG)	Insert or realign comment on current line (or region if a region is active). If line/region is already commented, uncomment it. - On a single line, the comment is placed <i>after</i> the code. C-u M-; executes comment-kill
		(pel-comment-dwim ARG)	Same as comment-dwim but comments the current line with a numeric ARG or 0.
Nix control	⚠️ The nix-mode supports several commands and scenarios. Refer to the nix-mode manual @ Github. PEL integration is very preliminary. ⚠️
